**Quote Total \$45,000.00**

NOTES:

\*\*\*ASSUMPTIONS\*\*\*

1) Primary assumption(s) associated with this agreement:

- a. Customer has indicated and agreed that all local wiring and internal network/client support within each and every individual space will be the sole responsibility of the customer
- b. Delivery of infrastructure, (M.C. Dean/OpenBand provided/supported), services will therefore be extended to any/all existing wall/floor jacks necessary, as identified by customer

2) M.C. Dean/OpenBand will maintain necessary onsite personnel and Network Engineering support, in order to continue the highest levels of support to IPAC '15 as we have successfully maintained for over 10 years

3) Above pricing is contingent upon ALL services being included together and paid as one single order, from the same payment source

\*Client will be providing onsite IT support to manage installation of all local cabling and Intranet configurations

---
