Aquileia features an extremely important archaeological area, which is a UNESCO World Heritage Site (since 1998). Aquileia one of the largest and wealthiest cities of the Early Roman Empire, was destroyed by Attila in the mid-5th century. The patriarchal basilica, an outstanding building with an exceptional mosaic pavement, played a key role in the evangelization of a large region of central Europe.

Venice, built on more than 100 small islands in a marshy lagoon in the Adriatic Sea. Its stone palaces seemingly rise out of the water. There are no cars or roadways, just canals and boats. The Grand Canal snakes through the city, which is filled with innumerable narrow, mazelike alleys and small squares (... description from Google, but Venice, about 1:30 hours by bus from Trieste, doesn't need any introductions)

AUGUST 29 - SEPTEMBER 3
Trieste, Italy

This conference was a great success and we will repeat the experience 17 years later.

Trieste is well renowned for its **writers, artists and food**. It's located on the sea, and thus benefits of a pleasant Mediterranean climate, particularly nice at the end of August.

Trieste is a safe city, where **hotels, monuments, congress centre and shopping are within walking distance**. It's worth discovering as James Joyce and several other distinguished writers did
